Susan Wright, Licensing and Certification Analyst, and Kerry Atkinson, Licensing and Certification Supervisor, completed an unannounced licensing compliance review at the above address. An inspection of the facility premises and a review of policies, procedures, staff and resident files were conducted for compliance with Title 9, Chapter 5, California Code of Regulations (CCR) requirements. Present during this review was Executive Director, Malia Martyak.

It is important that the licensee comply with regulations and the instructions of this notice of deficiency. Written verification of the correction of all deficiencies or a corrective action plan (CAP) must be submitted to the Department and postmarked **no later than 30 days from the date this report is received.** Failure of the licensee to comply shall result in the assessment of civil penalties, which may result in other possible enforcement actions, such as license suspension or revocation.

The following deficiencies were noted:

- 1) Title 9, Section 10564(c) Personnel Requirements Class B

The above section states, in part, "In addition to the requirements of (b) of this regulation, program staff who provide counseling services (as defined in Section 13005) shall be licensed, certified, or registered to obtain certification pursuant to Chapter 8 (commencing with Section 13000)."

The licensee was deficient in meeting this regulation because current licensure, certification or registration for certification was not located for the counseling staff members #2, #4 and #9 & #10. Proof of counselor registration was received by the Department for employee #10 (only) on 9/19/11.

- 2) Title 9, Section 10564(e) (1) Personnel Requirements Class B

The above section states, in part, "All staff is in good health verified by a health screening and a test for tuberculosis not more than 60 days prior to or 7 days after employment, and is renewed every year."
